ANA KHOMASURIDZE

Junior Front-End Developer

I started studying front-end web programming at the beginning of 2022 when I took a 6-month course where, in addition to HTML, CSS, and JS, I learned the basics of Angular. In the same period, I participated in the Women Tech Hub project of Ilia State University funded by the British Council, where I received both theoretical and practical trainings in the direction of WEB development. I also took Udemy courses in advanced CSS and SCSS, and currently, I'm taking a Javascript and React course. From October 2022, I am working as an intern at the Ascended startup company, where I do real projects, try to learn more and gain experience.
